LAUNDRY & DRY CLEANING

Oakville

Oakville, Oct. 14.- Miss Jacqueline Cobbs spent the week-end with her father, Mr. Jack Cobbs in Richmond.

Jessie Campbell spent the week-end with his wife and parents, Mr. and Mrs. Hazel Campbell.

The Junior Class of Mt. Comfort Church had a "wiener roast" at the home of their Sunday School teacher, Mr. Herbert Richardson, Saturday evening.

Mr. and Mrs. James D. Marshall left Tuesday morning for Florida, where they will spend their vacation. "Doug" and "Kathy" are staying with their grandaparents, Mr. and Mrs. Clarke Moore while they are away.

Miss Opal Coleman and Mrs. Clarence Moore gave Mrs. Claude Allen Moore a shower Saturday night at Mrs. Alton Moore's, with around fifty present. She received many nice gifts.

NO SECRET FORMULA IN PRODUCING MILK

What about feed additives for dairy cattle?

W. S. Griffith, dairy specialist at VPI, says that dairymen throughout Virginia and other parts of the United States have been hearing a great deal lately about feed additives which supposedly increase milk production.

In general, he says, dairymen must be careful not to spend money for questionable products. Griffith cites an experiment at Michigan State University to support his word of caution. There, researchers were concerned about the interest shown by dairy farmers in the feeding of live yeast to milking cows to increase production. They were also interested in studying the effect of a commercial material, Dynafac, on the performance of cows.

In the test, 15 milking Holstein cows were divided into five groups of three each, after considering daily milk production, body weight, and stage of lactation. Each group of three cows was fed three experimental grain rations according to a predetermined procedure. All of the cows were fed 30 pounds of good quality alfalfa hay per head daily. The rate of grain feeding was based on milk production, and the quality of the roughage determined according to U. S. Department of Agriculture recommendations. One group of cows received a standard grain ration, another group received a grain ration containing yeast, and another group received grain ration containing Dynafac.

Neither the live yeast culture nor the Dynafac had any significant effect on the butterfat content or total milk production. These supplements did not see m to affect the consumption of either grain or hay. The cows apparently found the three grain mixes equally palatable.

Considering the research, Griffith says Virginia dairymen are not advised to invest in these particular feed additives in the home of increasing milk production.

FOR HOMES of any size, style or floor plan. A sturdy, firesafe concrete home offers lifetime comfort and protection from destructive forces, yet costs less per year to own.

FOR FEED LOTS. Feeding floors built of concrete save you money, time and temper by keeping your livestock and barns cleaner, by saving feed and labor, by simplifying chores.

FOR SILOS. Concrete silos are moderate in first cost, take little maintenance, serve for years. They assure an ample supply of roughage through the winter months and droughts.
